(category B)

CURRICULUM VITAE

PERSONAL STATEMENT

I am a skilled film director, producer, and video editor. Upon request, I can present examples of my work, or you can check my website. I studied film and television production at a renowned Czech college, which has been holding first place among all colleges in Czechia. I have experience in many artistic disciplines, such as painting, dancing, and music, which I have been doing since early childhood.

Paradoxically, as an artist, I am also tech-savvy and I have extensive knowledge of film technologies, cameras, and computers; some time ago I worked with high-end 3D graphics as well. In video production, I create commercials, documentaries, short or feature films, motion design graphics, journalistic and instructional videos, news reports, and all for the Internet, television, or cinema.

I am looking for a challenging position in the film or television industry in the UK, ideally as a Film Director or a First AD. My current knowledge of English is Full Professional Proficiency. And I am fluent in another 3 languages.

My aim is to explore the UK film and television industry and meet new creative people and experts in this field. I will be honored to work with these professionals.
